It Might Get Loud

Continuity, privacy, and data management in the age of #voicefirst and messaging

Matt PM Cybulsky PhD

IONIA Healthcare Consulting

Voice and voice activation does represent one of the most important developments in the last 20 years. It is potentially as important as the development of the web itself because it makes accessing the underlying technology even easier for everyone to do.

- Cory Treffiletti MediaInsider, Chief Marketing Officer of Voicea

I've always felt that the human-centered approach to computer science leads to more interesting, more exotic, more wild, and more heroic adventures than the machine-supremacy approach, where information is the highest goal

-- Jaron Lanier *computer scientist, visual artist, composer*

The problem the patient is trying to solve is substantial enough to motivate her to act; nagging isn't enough

The solution to her “job” must help the patient live a better life and include features paving care innovation

THE DOCTOR

Why Is There a Shortage of Primary-Care Physicians in the U.S.?

Primary-care physicians—those who cover comprehensive health needs and provide continuing care for their patients—were once the foundation of a high-value American health care system. But now there is a looming deficit of the very professionals who health care reform depends on. Why may primary-care doctors soon become an endangered breed?

SUPPLY, DEMAND, AND THE FUTURE DECLINE OF PRIMARY CARE DOCTORS

The Association of American Medical Colleges projects that by 2015, the country will be close to 63,000 doctors short of the demand necessary to provide valuable medical care for its population. By 2025, that number could more than double.

*OF ALL SPECIALTIES

Although physicians of all specialties will be needed, primary-care physicians—including family doctors, general practitioners, and pediatricians—will be seeing a considerable shortage in the coming years.

GROWING DEFICIT OF PRIMARY CARE PHYSICIANS

WHAT'S UP, DOC?

Waning Interest in the Career

Only 32 percent of physicians in the U.S. are primary-care providers. The rest are specialists in careers like radiology, cardiology, and dermatology.

68%
SPECIALISTS

32%
PRIMARY CARE

Recent surveys of **GRADUATING MEDICAL SCHOOL SENIORS** SHOW THAT **ONLY A SMALL FRACTION WANT TO GO TO GO INTO PRIMARY-CARE MEDICINE.**

TYPE OF PRIMARY-CARE DISCIPLINE THEY WANT TO PURSUE A CAREER IN

Income Disparity

A Medscape report found that 54 percent of primary-care physicians don't feel fairly compensated and are, on average, paid less than those that specialize. As a result, less choose primary care as a career.

AVERAGE SALARY (2011)

Looming Baby Boomer Wave

The percent of people in the U.S. over age 65 is expected to nearly double between 2000 and 2050. As they age, this senior population is more likely to develop multiple chronic conditions and will have to be cared for by primary-care physicians who specialize in long-term health management.

PERCENT OF THE U.S. POPULATION WHO ARE 65+

Retirees

E
CNP
KIRWD

ALMOST 25% OF PRIMARY-CARE DOCTORS ARE 56 OR OLDER.

AND IT'S LIKELY THAT MANY OF THESE PHYSICIANS WILL RETIRE WITHIN THE NEXT DECADE.
